

I am requesting the specific privileges marked below. I understand that I may request additional privileges, or privileges in another Clinical Department, at any time. I also understand that the granting of these privileges is subject to verification of proficiency by the Chair of the Department, the Credentials Committee of the Medical Staff, and/or any other person or body appropriately designated under the Bylaws, Rules and Regulations of the Medical Staff.

I understand that in an emergency (any situation in which any delay in administering treatment would result in serious harm to the patient or an immediate threat to the life of the patient), I am authorized to treat any medical disease and/or perform any medical or surgical procedure indicated that is within the scope of my license.

Basic Education/Certificates: M.D. or D.O

Minimum Formal Training in Urology: Successful completion of an ACGME- or AOA-accredited residency in urology and current certification or active participation in the examination process (with achievement of certification in accordance with UCSF Medical Staff bylaws) leading to certification in urology by the ABU or in urological surgery by the AOBS, or foreign training and board equivalency;
and/or

Minimum Formal Training in Urology followed by successful completion of an accredited fellowship in pediatric urology and current subspecialty certification or board eligible (with achievement of certification in accordance with UCSF Medical Staff bylaws) leading to subspecialty certification in pediatric urology by the American Board of Urology or foreign training and board equivalency.

and/or

Minimum Formal Training in Urology followed by successful completion of an accredited fellowship in urogynecology and reconstructive pelvic surgery and current subspecialty certification or board eligible (with achievement of certification in accordance with UCSF Medical Staff bylaws) leading to subspecialty certification in urogynecology and reconstructive pelvic surgery by the American Board of Urology or foreign training and board equivalency.

Renewal Criteria: Practitioners who do not meet the activity levels for maintenance/renewal criteria (such as Courtesy appointee) for particular privileges may submit – from their primary practice location—either;

- A.) A peer reference from the service Chief or Chair attesting to clinical competence in the requested privileges, or
- B.) Case-logs of clinical activity from their primary practice location.

**CATEGORY 1
Core Urology Privileges**

Requested		Privilege Description	Initial Criteria	Renewal Criteria	Proctoring
Adult	Pediatric				
		<p>A - Core privileges for Urology and Pediatric Urology Core privileges for urology include the ability to admit, evaluate, diagnose, treat (surgically or medically), and provide consultation to patients of all ages presenting with medical and surgical disorders of the genitourinary system and the adrenal gland, including endoscopic, percutaneous, and open surgery of congenital and acquired conditions of the urinary and reproductive systems and their contiguous structures. Physicians may provide care to patients in the intensive care setting in conformance with unit policies, and are able to assess, stabilize, and determine the disposition of patients with emergent conditions consistent with medical staff policy regarding emergency and consultative call services. The core privileges in this specialty include the following procedures list and such other procedures that are extensions of the same techniques and skills.</p> <ul style="list-style-type: none"> • Performance of history and physical exam • Anterior pelvic exenteration • Appendectomy as a component of a urologic procedure • Bowel resection as a component of a urologic procedure 	2 See Minimum formal training above	Maintenance of these procedural privileges requires demonstrated competence of at least 5 procedures with acceptable results within the past 24 months	(5) encounters with satisfactory outcomes for each requested procedure must be submitted to complete proctoring

- Closure evisceration
- Continent reservoirs
- Enterostomy as a component of a urologic procedure
- Inguinal herniorrhaphy as related to a urologic operation
- Intestinal conduit
- Management of congenital anomalies of the genitourinary tract (presenting in adults), including epispadias and hypospadias
- Microscopic surgery (epididymovasostomy and vasovasostomy)
- Open stone surgery on kidney, ureter, and bladder
- Percutaneous aspiration or tube insertion
- Performance and evaluation of urodynamic studies
- Surgery of the lymphatic system, including lymph node dissection (inguinal, retroperitoneal, or pelvic), excision of retroperitoneal cyst or tumor, and exploration of retroperitoneum
- Surgery of the testicle, scrotum, epididymis, and vas deferens, including biopsy; excision and reduction of testicular torsion; orchiopexy; orchietomy; epididymectomy; vasectomy; vasovasostomy; and repair of injury
- Surgery upon the adrenal gland, including adrenalectomy and excision of adrenal lesion
- Surgery upon the kidney, including total or partial nephrectomy, including radical transthoracic approach; renal surgery through established nephrostomy or pyelostomy; and open renal biopsy
- Surgery upon the penis, including circumcision; penis repair for benign or malignant disease; grafting, excision, or biopsy of penile lesion; and insertion, repair, and removal of penile prosthesis
- Surgery of the ureter and renal pelvis, including uterolysis, insertion/removal of ureteral stent, and ureterocele repair (open or endoscopic)
- Surgery of the urethra, including treatment of urethral valves (open and endoscopic), urethral fistula repair (all forms, including grafting), urethral suspension procedures (including grafting, all material types), visual urethrotomy, sphincter prosthesis, and periurethral injections (e.g., collagen)
- Surgery of the urinary bladder for benign or malignant disease (including partial and complete resection), diverticulectomy and reconstruction, bladder instillation treatments, cystolithotomy, total or simple cystectomy, creation of neobladders, and repair of bladder injury and bladder neck suspension
- Surgery of the prostate, including transrectal ultrasound-guided and other biopsy techniques, all forms of prostate ablation, and all forms of prostatectomy
- Ventral/flank herniorrhaphy as related to urologic operation

- B - Endoscopic Surgery
- Cystoscopy
 - Laparoscopic surgery for disease of the urinary tract
 - Laparotomy for diagnostic or exploratory purposes (urologic-related conditions)
 - Percutaneous nephrolithotripsy
 - Transurethral surgery, including resection of prostate and bladder tumors
 - Transvesical ureterolithotomy
 - Ureteroscopy, including treatment of all benign and malignant processes
 - Urethroscopy, including treatment of all benign and malignant processes

2 See Minimum formal training above
